

Set Design: ARCADIA

Amy Xiao

ADDITIONAL NOTES

if 9ft/10ft/extended door not possible, all designs can be simplified to this

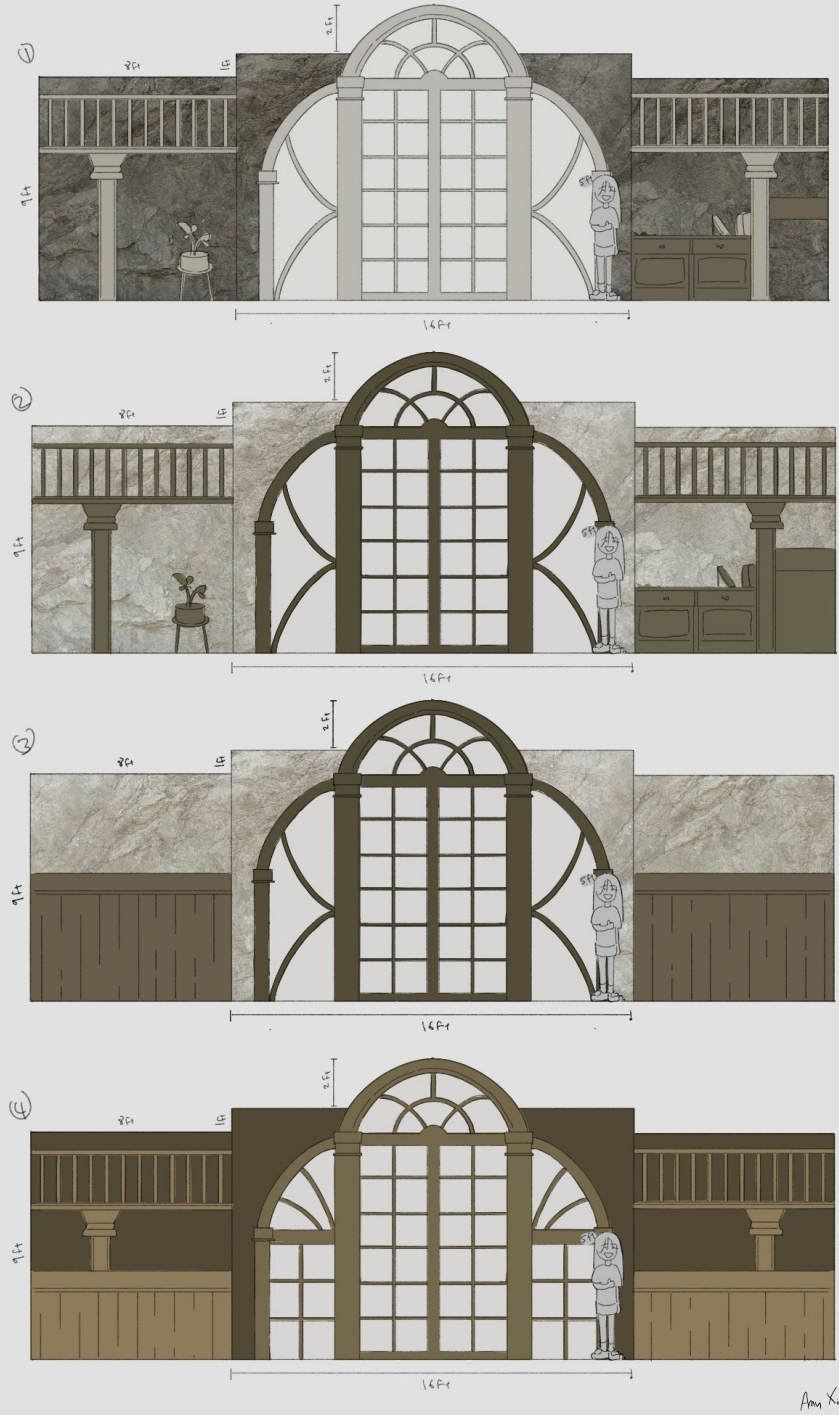

additional wall texture ideas:

* paint the textures to look 3d → would have to carefully plan lighting

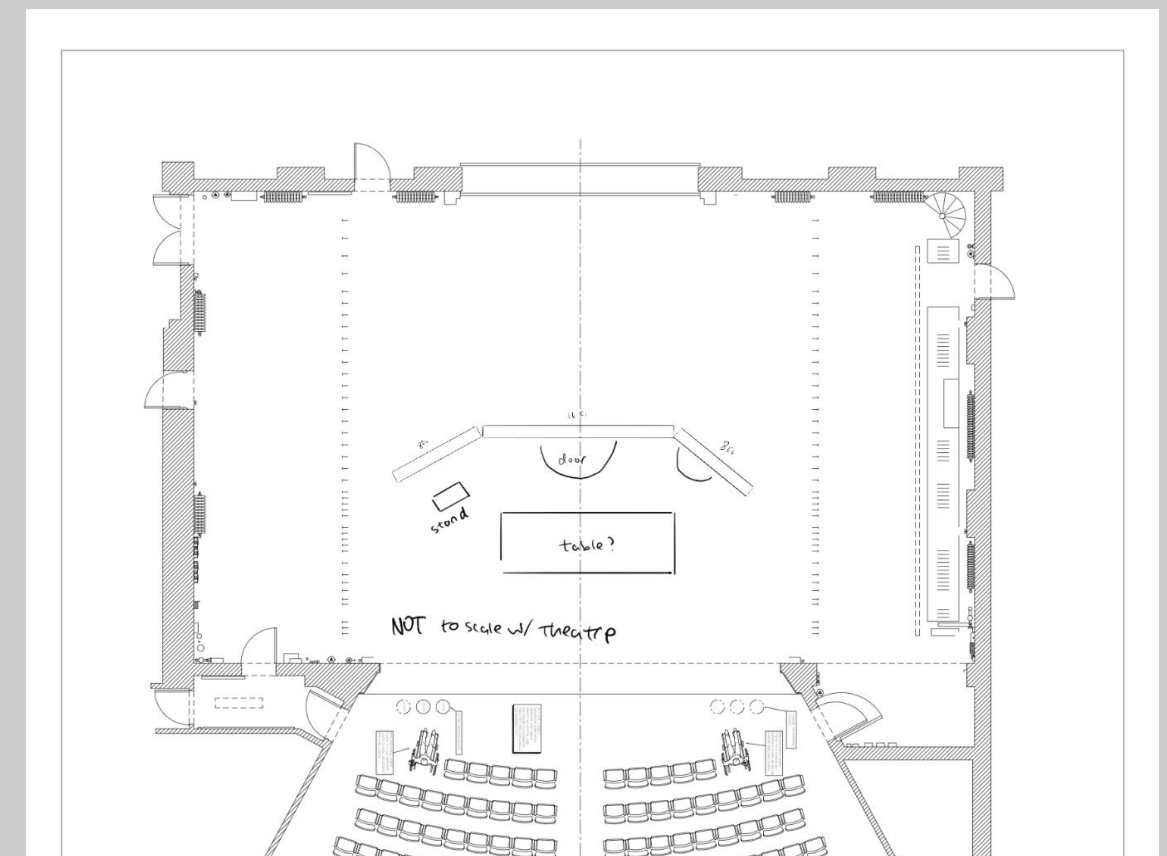

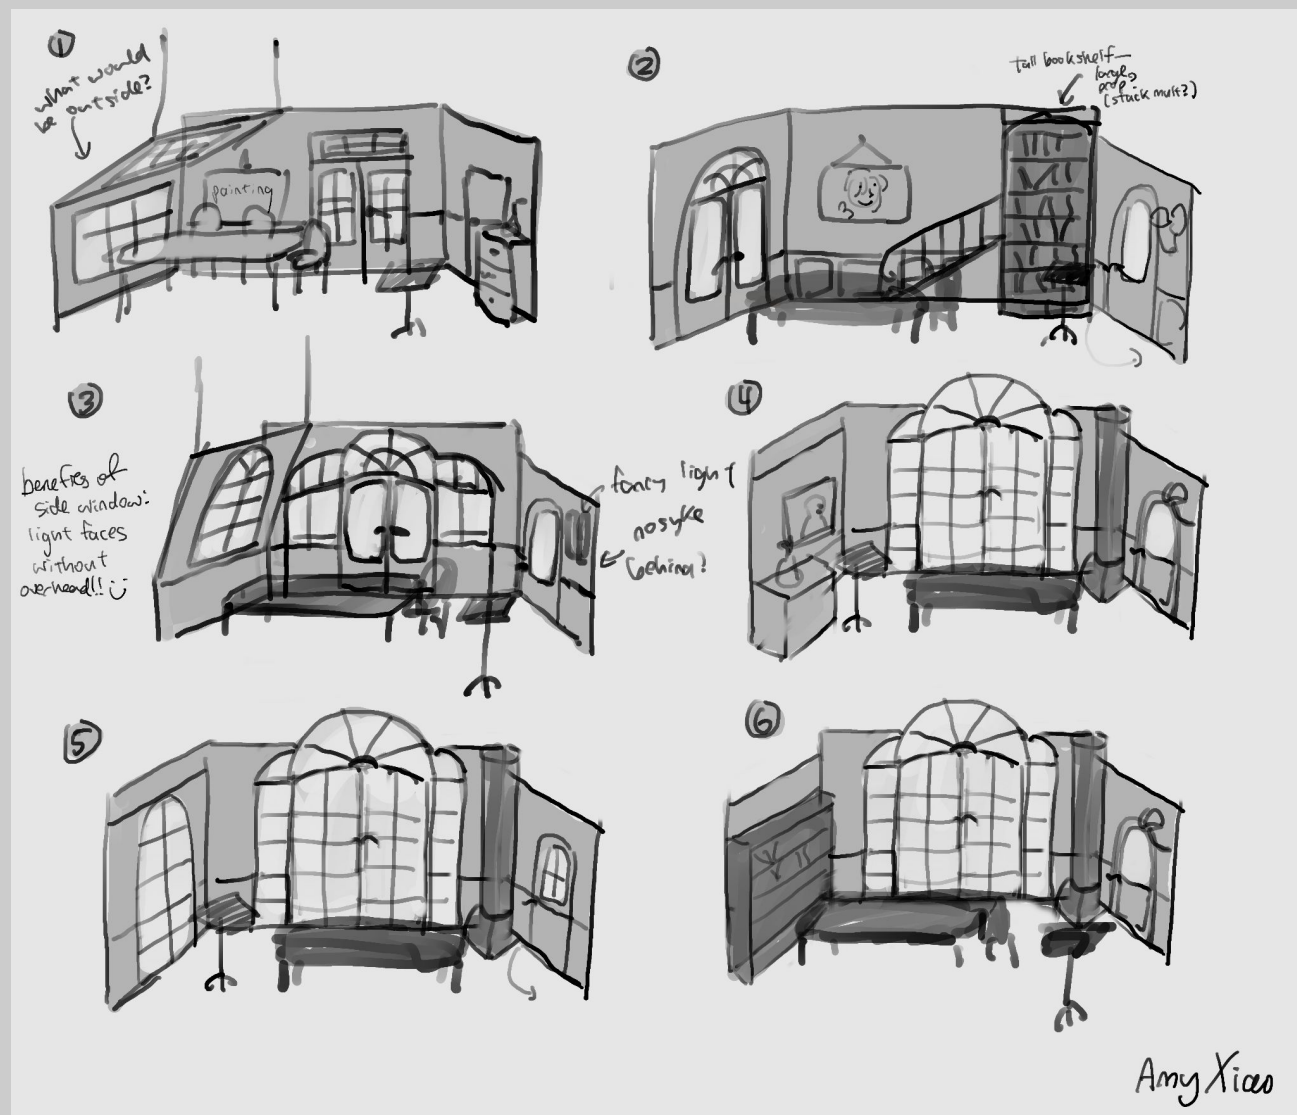

if painting side elements, use impressionistic style (loose, hue variation)

for side panel elements, carefully angle & calculate perspective before painting to give 3d illusion? * would require lots of expertise

ARCADIA PRELIMINARY SET DESIGN

Amy Xiao

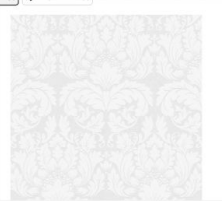

*if not obtainable, just leave blank/ we can discuss

wall paper

key words: floral baroque damask (white/ cream)

possible options:

- 1) [canvas damask vinyl roll home depot \(\\$26\)](#) taupe
- 2) [cream white damask amazon \(\\$38\)](#)
- 3) [harbor mist grey jasmine home depot \(\\$60\)](#)
- 4) [Jan White Damask Vinyl Non-Pasted Textured Paintable Wallpaper \(\\$38\)](#)

wainscoting panel material (if buying)

ideas:

- 1) [art 3d antique gold 3 set amazon \(\\$58\)](#)
- 2) [Custom Precut Wall Paneling Set, Wall Moulding DIY Package, Wainscoting Panels, Ready to Assemble etsy \(\\$50\)](#)
- 3) home depot ekena millwork has multiple sizes but cost adds up
a) [scalloped \(curved\)](#)

notes:

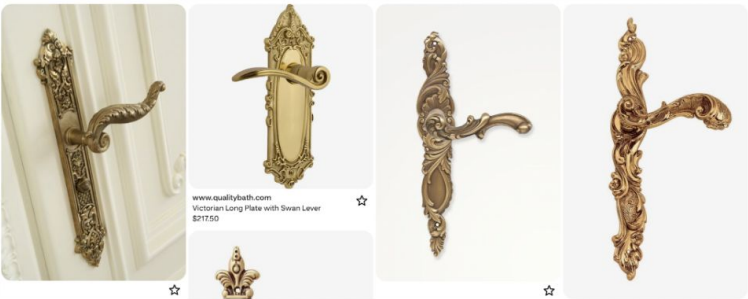

- feel free to replace curved corner with ornate corner like (2)
- side view is only recommendation if building from scratch, do whatever is practical...
- paint gold if not gold already (see next slide)

door handle

unclear how this works – do we build from scratch or obtain from props warehouse?

ideas:

main wall paint color

technique: scumble (hue + brightness variation)

- start with lightest color
- vary hues
- add in darkest last

notes:

- can change where color leans depending on wallpaper color (should be similar)
- if we don't have the color in stock, don't need to buy → just mix with white and primaries (we can talk about this later)
 - we just need lots of white paint, and some red, yellow, and blue
- If buying, select from <https://www.homedepot.com/b/Paint-Ideas/white/00> (we can discuss)

main wall paint color

goal: distressed/weathered cream white plaster (imagine house built in 16th century, now 1809 or even later), lean a little pink/yellowish

things to cut if budget tight :(

- 1) get rid of columns, spread out wainscoting to compensate
- 2) get rid of wallpaper
- 3) less paint colors (although I don't think mixing different hues should cost much?)
- 4) if the wainscoting has to go then add paintings :(

things to add if budget allows :)

- 1) fleur de lis topper at top of door
 - a) [estv](#) option... not in amazon or home depot
 - b) would be awesome if found in prop warehouse
- 2) keystone at top of door
